## Specifications:

### Schliemann

Type 50005 I

**Floor height:**  
140 cm

**Age recommendation**  
From 3 year

**Maximum fall height**  
225 cm

**Product dimensions (LxWxH)**  
566 x 461 x 391 cm

**Area requirements incl. safety distances (LxW)**  
906 x 749 cm

**Approx. installation time**  
2 persons 7 hours

**Amount of activities**  
8 activities

Ledon Explore for the 3 to 7 year olds offers activities that invite to numerous hours of quality play. Children develop a great deal between 3 and 7 years of age, which is why we supply the structures for this age group with an extra wide variety of activities.

Several items like e.g. the kitchen, the stove and the kiosk, prompt role and group plays. The children will re-enact different situations, they will examine and test their limits - which is a healthy and important part of their development. Role plays also stimulate language development and train social skills. The structures come with the children's favourites - rope bridges, jungle huts, slides, lookout barrels, tube slides and last, but not least, rope tunnels.

## Jeep

There are new adventures waiting when the children take off for an exciting trip in the jeep, whisking over bumpy, windy roads through the woods. You can go for really wild rides through exciting imaginative areas. There are a lot of activities with movable parts that help strengthen motor skills and imagination.

## Rope ladder

Climb aboard the Ledon Explore ship, cast off and hoist the anchor! There is enough wind in the sails, and new adventures are ahead. The rope ladder climbing access adds to an authentic adventure experience on our ships, whenever they set sail to explore new countries and continents. A challenging climbing net for the Explore ship, with differently shaped mesh that challenges and trains both balance and coordination skills.

## Slide PE

The snake is as smooth as an eel – which is good, because that means you slide down at top speed! Going down the snake slide helps children understand the principle of cause and effect and stimulates their vestibular system. Ledon's open slides hardly heat up in the sun since they are made of polyethylene.

## Spider climbing wall

The treasure has been hidden in the top cave for centuries. The climbing wall is fitted with holes for the feet and climbing stones, so you can climb up differently every time. How high can you climb? The measure on the wall will tell! An exciting item that trains both strength and hand-eye-coordination.

## Monkey bar

The monkey bar is meant for older children who will have to move their limbs crosswise while lifting their own weight! A big challenge!

## Twisted net

A really challenging climbing net even for good climbers! With its twist, it really puts their coordination skills to the test.

Because the net is so nice and long, it can have several children climbing in it at the same time.

## Climbing net

Working your way through a climbing net strengthens both eye-hand and inter-limb coordination. These skills are vital for learning to read and write.

# Clearance and safety surfaces

## Platzbedarf und Fallschutzunterlage • Pladshensyn og faldunderlag

Safety surface in accordance with EN 1176

Fallschutzunterlag gemäß EN 1176

Faldunderlag i overensstemmelse med EN 1176

	Height • Höhe • Højde	(*) Area • Fläche • Areal
<b>A</b>	≤60 cm	5,7 m <sup>2</sup>
<b>B</b>	(**)100 cm	3,4 m <sup>2</sup>
<b>C</b>	140 cm	7,2 m <sup>2</sup>
<b>D</b>	150 cm	1,5 m <sup>2</sup>
<b>E</b>	214 cm	2,1 m <sup>2</sup>
<b>F</b>	225 cm	27,9 m <sup>2</sup>
Total		47,8 m <sup>2</sup>

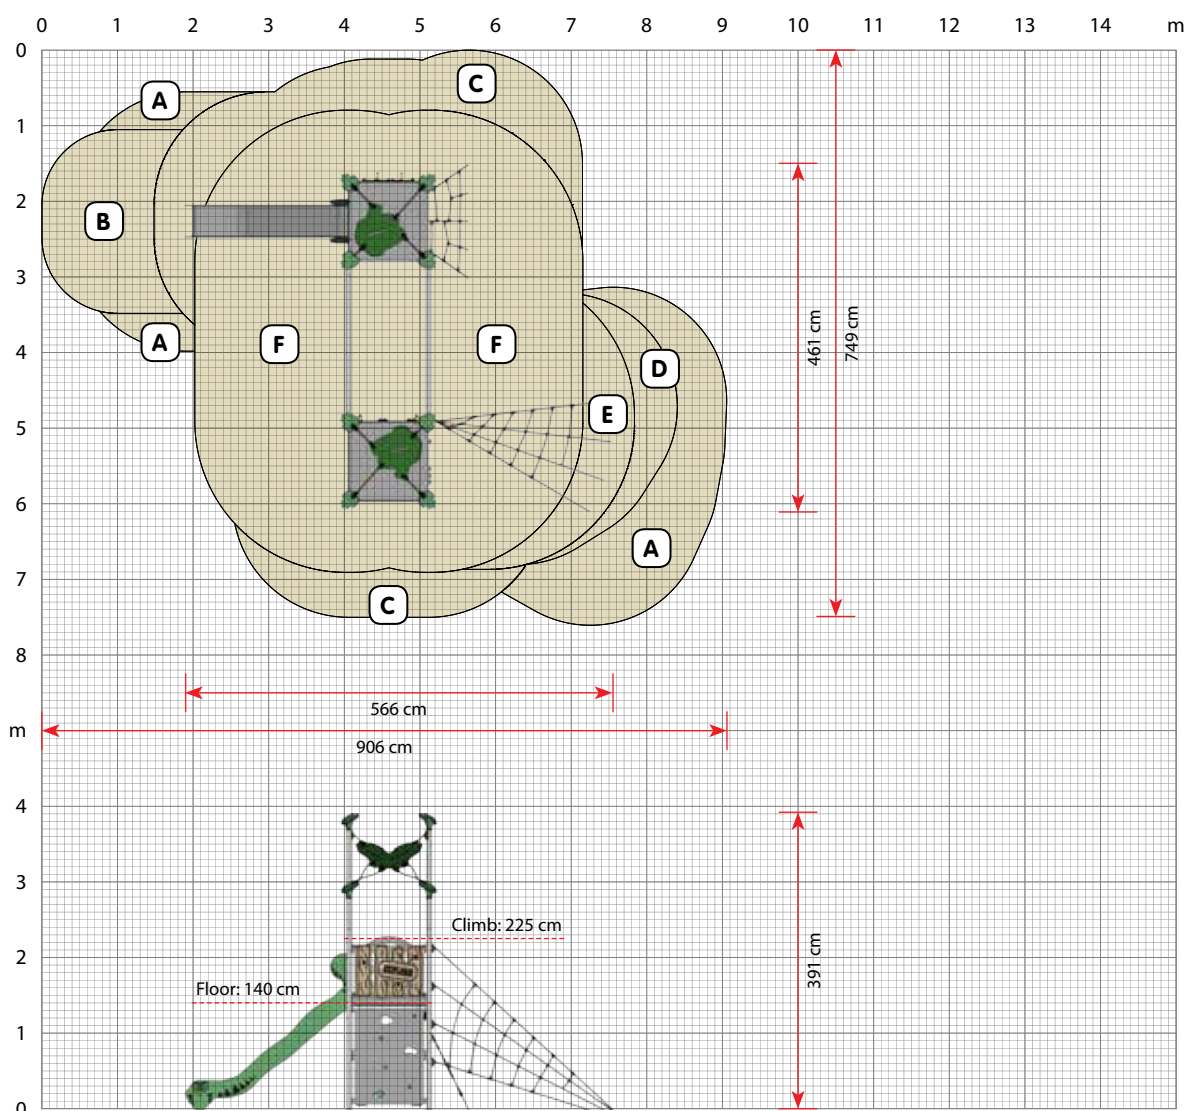

(\*) Areas are accurately calculated values which are difficult to achieve in practice.

Die Flächen haben die genaue berechneten Werte, aber sind schwer in Praxis zu erreichen. Arealerne er nøjagtigt beregnede værdier, som er vanskelige at opnå i praksis.

(\*\*) Slide exit areas are equivalent to a height of 100 cm.

Der Auslaufs Bereich der Rutsche, ist äquivalent eine Höhe von 100 cm. Rutsjebaneudløbsområder svarer til en højde på 100 cm.

# Materials

## Polyethylene

All polyethylene boards are especially developed for Ledon, aiming at getting the best possible quality. The material is maintenance-free and extremely hard-wearing – even scratches and fissures do not reduce its durability.

The boards are non-toxic and comply with EN71 (safety requirements for toys) as well as with the requirements of the United States Food & Drug Administration (FDA) as outlined in the CFR (Code of Federal Regulations) Title 21, Section 177.1520.

Our polyethylene boards are available in 11 different colours with a black core. The boards are UV-stabilized regarding both shape and colour. We give 5 years guarantee on considerable fading.

## Skid-proof polyethylene

Our skid-proof polyethylene board is coated with a 3 mm rubber layer. Being a gimmick from the car industry, it also provides our playground items with extremely durable and skid-proof surfaces. We use this board for all stepping and seating surfaces.

## Nylon parts

All handles are made of nylon (PA6), have round edges and are shaped to offer good grip. This reduces eye and dental injuries. Fingers won't freeze to them. All parts are UV-stabilized regarding shape and colour. They are impact-proof from -40° C to +110° C. All parts are maintenance-free.

## Nut covers

All nuts and bolt ends are capped with nut covers, protecting children from sharp edges and the playground items from unwanted demounting.

## Screws and bolts

Most of our playground items are assembled with either bolts, screws or specially designed aluminium bushes. All screws and bolts are made of stainless or galvanized steel.

## Metal pipes

All metal pipes and posts are galvanized to avoid rust. Metal pipes make a very stable construction and do not deform.

## Fittings

All fittings have got round edges and are galvanized.

## Ropes and net

All ropes and nets are made of six strands with eight steel wires each, that is a total of 48 steel wires protecting against vandalism. The rope can take a peak load up to 4,500 kg and does not brittle nor get slack. All climbing nets are put together with joints of impact-proof nylon (PA6).

# Ledon's warranties

– your assurance of quality and durability

## 20 Years warranty:

- Boards of HDPE
- Steel posts and top beams
- Floor beams and steel frames
- Other galvanized bearing parts
- Components of stainless steel

## 10 Years warranty:

- Other galvanized fittings
- Components of spray cast PE and PA6
- Cedar wood and Robinia
- Larch wood not touching the ground

## 5 Years warranty:

- Painted metal parts
- Springs
- Ropes

## 2 Years warranty:

- Movable plastic and metal parts

Ledon's warranties cover material faults in the stated length of time for the respective material. The warranty is only valid if the product was set up correctly and in accordance with Ledon's assembly instructions.

Ordinary wear and tear is not covered by Ledon's warranties, nor are damages caused by vandalism or misuse.

Changes in the material that only alter the product's appearance – such as changes in colour and shrinkage cracks in wood – are not covered by the warranty. However, we give 5 years guarantee on considerable fading of HDPE.

Products exposed to wet sand and salt conditions are not covered by Ledon's warranty against corrosion.

## Products approved of IAW EN I 176

Safety has got top priority at Ledon, which is why all our play items of course are checked and approved of IAW EN I 176. All certifications are made by TÜV or corresponding authorities. The TÜV-badge is only for products that live up to very strict safety, reliability and quality regulations.
